

St. Catharine Preschool
Faith Filled Learning!

What is Faith-Based Learning?

Children are born with a natural spirituality. Sometimes in a difficult situation you will observe children displaying wisdom and understanding in a way which amazes the adults. Children integrate their spirituality with other developing areas including cognitive, physical, social, and emotional development all shaped by their interaction with parents, family, peers, teachers, and their community.

At St. Catharine Preschool, children learn about their faith through meaningful, age-appropriate activities. Prayers and joyful songs start each day on a happy note. Respect for themselves, others and the environment are always encouraged, helping our students develop kindness and good social skills. Most importantly, the children walk in Jesus' footsteps as they learn to love and care for each other and share with those in need through our community outreach projects throughout the year.

Further information on children and spirituality and excellent book is available for parents to read. The title is: "The Spiritual Child" by Lisa Miller, Ph.D.
